

# H Alabama Medicaid Physician Drug List

Effective for dates of service January 1, 2004 and thereafter, Medicaid will begin using only HCPCS codes.

### H.1 Policy

#### H.1.1 Injections

Medicaid covers physician drugs when billed by a physician using the new list of approved HCPCS codes.

The HCPCs drug codes are intended for use in Physician office and Outpatient billing of manufactured medications given in each respective place of service. The Alabama Medicaid Agency only reimburses for compounded medications by the billing of NDC numbers through the Pharmacy Program directives.

Appropriate administration code(s) in the Current Procedural Terminology (CPT) may be billed in addition to the HCPCS drug codes and office visit codes for the same date of service. Please refer to the following section "Evaluation and Management Codes Billed in Conjuction With Drug Administration Codes" for details concerning office visits, chemotherapy administration, hydration therapy and chemotherapy, and date specific changes.

Added:
Appropriate
administration
code (s) ...date
specific changes.

#### Medicare/Medicaid Drugs

Medicare Part B covers some drugs in a physician's office. If the recipient is dually eligible for Medicare and Medicaid, the HCPCS code should be billed first to Medicare.

Medicare Part D drugs are a pharmacy benefit and should not be billed to Medicaid by physicians or outpatient facilities. Part D drugs are billed to Medicare on a pharmacy claim with the NDC number.

Not all drugs listed in Appendix H are considered Part B drugs.

#### Site-Specific Injections

Both the relevant CPT and J codes are billed. For example, a subconjunctival injection to the eye would be billed as 68200 (CPT) with a separate J code for the drug; thus, site specific injections are submitted as two lines.

# EVALUATION AND MANAGEMENT CODES BILLED IN CONJUNCTION WITH DRUG ADMINISTRATION CODES

#### Effective for Dates of Service 01/01/2006 and Thereafter

When an Evaluation and Management Code (E & M) is billed, medical record documentation must support the medical necessity of the visit as well as the level of care provided. CPT Guidelines are utilized to determine if the key components of an Evaluation and Management Code are met. When an Evaluation and Management service is provided and a Drug Administration code (90772, 90773, 90774, and 90775) is provided at the same time, the E & M code, Drug Administration Code, and the HCPCs Code for the drug may be billed.

However, when no E & M service is actually provided at the time of a Drug Administration, an E & M code should not be billed. In this instance, the Drug Administration Code and the HCPCs Code for the drug may be billed. An example of this is routine monthly injections like B-12, iron, or Depo-Provera given on a regular basis without an E & M service being provided.

There have been 2006 CPT Code changes to describe other Administration Codes for Hydration (90760, 90761), Therapeutic, Prophylactic, and Diagnostic Infusions (90765, 90766, 90767, 90768) and Chemotherapy Administration Codes (96401-96542). A Significant Separately Identifiable Service must be performed in conjunction with these administration codes for consideration of payment for an Evaluation and Management Code to occur. A **Modifier 25** must be appended to the E & M service for recognition as a "**Significant Separately Identifiable Service**". Procedure Codes 99211 will not be allowed with Modifier 25 or in conjunction with the administration codes for the same date of service. Medical record documentation must support the medical necessity and level of care of the visit. These services are subject to post payment review.

#### **Chemotherapy Injections**

#### For Dates Of Service Prior To July 1, 2005

Medicaid will pay separately for cancer chemotherapy medications (e.g., J codes) and chemotherapy administration (e.g., 96400-96450). If an office visit occurs on the same day as chemotherapy, the office visit must be a significant, separately identifiable evaluation and management service by the same physician.

Physicians will also be paid separately for chemotherapy injections when provided with an infusion during an office visit. (Again, there must be a different diagnosis code than that of cancer.) Separate payments will be made for each chemotherapeutic agent furnished on the day of chemotherapy. This also includes chemotherapy injections when provided with an infusion during an office visit.

Medicaid will not pay for chemotherapy administration in a hospital setting, and claims for these codes with modifier 26 will not be recognized.

#### **Hydration Therapy and Chemotherapy**

#### For Dates Of Service July 1, 2005 Through December 31, 2005

Effective for Dates of Service July 1, 2005 and thereafter, the Alabama Medicaid Agency will adopt Medicare's Drug Pricing Methodology using the Average Sale Price (ASP) for HCPCS injectable drug codes. In keeping with Medicare guidelines, Alabama Medicaid will also adopt the temporary G codes designated for Chemotherapy and Non-Chemotherapy administration codes. These codes are effective for services provided on or after July 1, 2005 and before January 1, 2006. The crosswalk between the previous codes and the new codes is outlined on below.

The following CPT drug administration codes will remain in effect and covered for 2005.

- CPT code 90783 and 90788,
- CPT codes 96405 to 96406.
- CPT codes 96420 to 96520, and
- CPT codes 96530 to 96549.

The change to the G codes brings about an improvement in billing and reporting codes through the creation of new codes to identify initial infusions and additional sequential infusions. There are also new codes to identify additional non-chemotherapy sequential intravenous pushes and intravenous chemotherapy pushes for additional drugs.

Alabama Medicaid has established the following new guidelines that should be utilized by physicians when billing for administration codes.

- For non-chemotherapy injections, services described by codes G0351, G0353, G0354, and CPT codes 90783 and 90788, may be billed in addition to other physician fee schedule services billed by the same provider on the same day of service.
  - For IV infusions and chemotherapy infusions, if a significant separately identifiable E & M service is performed, the appropriate E & M CPT code should be reported utilizing modifier 25.
- When administering multiple infusions, injections, or combinations, only one "initial" drug administration service code should be reported per patient per day, unless protocol requires that two separate IV sites must be utilized. The initial code is the code that best describes the service the patient is receiving and the additional codes are secondary to the initial code.
- "Subsequent" drug administration codes, or codes that state the code is listed separately in addition to the code for the primary procedure, should be used to report these secondary codes. If an injection or infusion is of a subsequent or concurrent nature, even if it is the first such service within that group of services, then a subsequent or concurrent code from the appropriate section should be reported.
- If the patient has to come back for a separately identifiable service on the same day, or has 2 IV lines per protocol, these services are considered separately billable with a modifier 76.

Old Code	New Code	Descriptor	Add-On Code
90780	G0345	Intravenous infusion, hydration; initial, up to 1 hour	
90781	G0346	Intravenous infusion, hydration; each additional hour, up to 8 hours (List separately in addition to code for procedure)	Yes
90780	G0347	Intravenous infusion, for therapy/diagnosis; initial, up to 1 hour (Specify substance or drug)	
90781	G0348	Intravenous infusion, for therapy/diagnosis (Specify substance or drug); Each additional hour, up to 8 hours (List separately in addition to code for procedure)	Yes
90781	G0349	Intravenous infusion, for therapy/diagnosis (Specify substance or drug); Additional sequential infusion, up to 1 hour (List separately in addition to code for procedure)	Yes
NA	G0350	Intravenous infusion, for therapy/diagnosis (Specify substance or drug); Concurrent infusion (List separately in addition to code for procedure)	Yes
90782	G0351	Therapeutic or diagnostic injection (Specify substance or drug); Subcutaneous or Intramuscular	
90784	G0353	Therapeutic or diagnostic injection (Specify substance or drug); Intravenous push, single or initial substance/drug	
NA	G0354	Therapeutic or diagnostic injection (Specify substance or drug); Each additional sequential intravenous push (List separately in addition to code for primary procedure)	Yes
96400	G0355	Chemotherapy administration, subcutaneous or intramuscular; Non- hormonal antineoplastic	
96400	G0356	Chemotherapy administration, subcutaneous or intramuscular; hormonal antineoplastic	
96408	G0357	Chemotherapy administration, intravenous; push technique, Single of initial substance/drug	
96408	G0358	Chemotherapy administration, intravenous; push technique, Each additional substance/drug (List separately in addition to code for primary procedure)	Yes
96410	G0359	Chemotherapy administration, intravenous infusion technique; Up to 1 hour, single or initial substance/drug	
96412	G0360	Chemotherapy administration, intravenous infusion technique, Each additional hour, 1 to 8 hours (List separately in addition to code for primary procedure)	Yes
96414	G0361	Chemotherapy administration, intravenous initiation of prolonged Chemotherapy infusion (more than 8 hours), requiring use of a Portable or implantable pump	
96412	G0362	Chemotherapy administration, intravenous	Yes

Old Code	New Code	Descriptor	Add-On Code
		infusion technique; Each additional sequential infusion, (different substance/drug) Up to 1 hour (List separately in addition to code for primary procedure)	
NA	G0363	Irrigation of implanted venous access device for drug delivery system Reimbursable only when performed as a single service	

#### For Dates Of Service January 1, 2006 And Thereafter

Effective for Dates of Service January 1, 2006 and thereafter, the Alabama Medicaid Agency will adopt the new CPT's Chemotherapy and Non-Chemotherapy administration codes. Alabama Medicaid will also discontinue coverage of the temporary G codes designated for Chemotherapy and Non-Chemotherapy administration codes effective December 31, 2005. The temporary G codes are effective for services provided on or after July 1, 2005 and before January 1, 2006. The crosswalk between the previous codes and the new codes is outlined on page 2 of this Alert. The following CPT drug administration codes will remain in effect and covered for 2006. Please refer to the CPT 2006 guidelines for Hydration, Therapeutic, Prophylactic, and Diagnostic Injections and Infusions (Excludes Chemotherapy) and Chemotherapy Administration codes. The following CPT code ranges are:

- CPT code ranges 90760 through 90775, and
- CPT codes ranges 96401 through 96542.

The change to the new codes brings about an improvement in billing and reporting codes through the creation of new codes to identify initial infusions and additional sequential infusions. There are also new codes to identify additional non-chemotherapy sequential intravenous pushes and intravenous chemotherapy pushes for additional drugs.

Alabama Medicaid has established the following new guidelines that should be utilized by physicians when billing for administration codes.

- For non-chemotherapy injections, services described by CPT codes 90772, 90774, and 90775 may be billed in addition to other physician fee schedule services billed by the same provider on the same day of service.
- For IV infusions and chemotherapy infusions, if a significant separately identifiable E & M service is performed, the appropriate E & M CPT code should be reported utilizing modifier 25.
- When administering multiple infusions, injections, or combinations, only one "initial" drug administration service code should be reported per patient per day, unless protocol requires that two separate IV sites must be utilized. The initial code is the code that best describes the service the patient is receiving and the additional codes are secondary to the initial code.

- "Subsequent" drug administration codes, or codes that state the code
  is listed separately in addition to the code for the primary procedure,
  should be used to report these secondary codes. If an injection or
  infusion is of a subsequent or concurrent nature, even if it is the first
  such service within that group of services, then a subsequent or
  concurrent code from the appropriate section should be reported.
- If the patient has to come back for a separately identifiable service on the same day, or has 2 IV lines per protocol, these services are considered separately billable with a modifier 76.

Old Code	New Code	Descriptor	Add- On Code
G0345	90760	Intravenous infusion, hydration; initial, up to 1 hour	
G0346	90761	Intravenous infusion, hydration; each additional hour, up to 8 hours (List separately in addition to code for procedure)	Yes
G0347	90765	Intravenous infusion, for therapy, prophylaxis, or diagnosis; initial, up to 1 hour (Specify substance or drug)	
G0348	90766	Intravenous infusion, for therapy, prophylaxis, or diagnosis; (specify substance or drug) each additional hour, up to 8 hours (List separately in addition to code for procedure)	Yes
G0349	90767	Intravenous infusion, for therapy, prophylaxis, or diagnosis (Specify substance or drug); Additional sequential infusion, up to 1 hour (List separately in addition to code for procedure)	Yes
G0350	90768	Intravenous infusion, for therapy, prophylaxis, or diagnosis (Specify substance or drug); Concurrent infusion (List separately in addition to code for procedure)	Yes
G0351	90772	Therapeutic, prophylactic, or diagnostic injection (Specify substance or drug); Subcutaneous or Intramuscular	
90783	90773	Therapeutic, prophylactic or diagnostic injection (Specify substance or drug); intra-arterial	
G0353	90774	Therapeutic, prophylactic or diagnostic injection intravenous push, single or initial substance/	
G0354	90775	Therapeutic, prophylactic or diagnostic injection; each additional sequential intravenous push of a new substance/drug	Yes
G0355	96401	Chemotherapy administration, subcutaneous or intramuscular; Non-hormonal antineoplastic	
G0356	96402	Chemotherapy administration, subcutaneous or intramuscular; hormonal antineoplastic	
G0357	96409	Chemotherapy administration, intravenous; push technique, single or initial substance/drug	
G0358	96411	Chemotherapy administration, intravenous push technique, each additional substance/drug (list separately in addition to code for primary procedure)	Yes
G0359	96413	Chemotherapy administration, intravenous infusion technique, up to 1 hour, single or initial substance/drug	
G0360	96415	Chemotherapy administration, intravenous infusion technique; each additional hour, 1 to 8 hours	Yes
G0361	96416	Chemotherapy administration, intravenous infusion technique; initiation of prolonged chemotherapy infusion (more than 8 hours), requiring use of a Portable or implantable pump.	
G0362	96417	Chemotherapy administration, intravenous infusion	Yes

Old Code	New Code	Descriptor	Add- On Code
		technique; each additional sequential infusion (different substance/drug) up to 1 hour (List separately in addition to code for primary procedure)	
96520	96521	Refilling and maintenance of portable pump	
96530	96522	Refilling and maintenance of implantable pump or reservoir for drug delivery, systemic (eg, intravenous, intra-arterial)	
G0363	96523	Irrigation of implanted venous access device for drug delivery systems	

Please refer to Chapter 19 (Hospitals) for details on chemotherapy administration and infusion therapy.

#### **Bevacizumab** (Avastin)

There are two new procedure codes (PC) available to use for billing Bevacizumab. Both codes became available 1-1-05. The description for code J9035 is "injection, bevacizumab, 10 mg". The description for code S0116 is "bevacizumab, 100 mg". As a reminder, Avastin should be administered in combination with standard chemotherapy drugs for colon cancer, e.g., Fluorouracil, Leucovorin, Oxaliplatin, and Irinotecan, according to the FDA.

#### **Prior Authorization Required for Orencia and Kineret**

Effective September 1, 2006, injectable drugs Orencia and Kineret will require prior authorization as Biologicals through Health Information Designs (HID) prior to treatment. Although these drugs have not been assigned HCPCS codes, you must request the Prior Authorization using procedure code J3490. After receiving authorization from HID, a CMS-1500 paper claim must be submitted to EDS including the dosage and NDC number. The letter of approval from HID must be attached to the claim, and "attachment" in block 19. These drugs must be approved through HID prior to administering and billing. HID may be contacted at 1-800-748-0130. The Prior Authorization forms are located on our website at www.medicaid.alabama.gov.

#### **Immune Globulin Replacement Codes**

Effective for dates of service January 1, 2006 and thereafter, Intravenous Immune Globulin has new codes. The codes are listed below for reference and may be viewed on the Physician Drug Fee Schedule on our website at www.medicaid.alabama.gov.

HCPCs Code	Long Description	Max Units
J1566	Injection, Immune Globulin,	140
	Intravenous, Lyophilized, (e.g.	
	powder), 500 mg.	
J1567	Injection, Immune Globulin,	140
	Intravenous, Non-Lyophilized, (e.g.	
	liquid), 500 mg	

Previous HCPCs Codes: Q9941, Q9942, Q9943, and Q9944 have been discontinued effective December 31, 2005.

#### **Allergy Treatments**

Physicians may bill for antigen services using only the component codes (i.e., the injection only codes 95115 or 95117) and/or the codes representing antigens and their preparation (i.e., codes 95144 through 95170). Physicians providing only an injection service must bill for only code 95115 or code 95117. Professional services for allergen immunotherapy multiple injections (procedure codes 95117 and 95125) should be billed using only one unit. Effective April 1, 2003, the Agency will deny claims for these procedure codes when more than one unit is billed.

Physicians providing only the antigen/antigen preparation service would bill the appropriate code in the range of 95144 through 95170. Physicians providing both services would bill for both services. This includes allergists who provide both services through the use of treatment boards.

Physicians will no longer use the "complete" service codes, and instead must bill for both the injection and the antigen services separately, even though the current CPT definitions of the antigen codes refer to vials and the physicians using treatment boards do not create vials.

Procedure codes 95144 - 95170 are used for the provision of single or multidose vials of allergenic extract for single patient use only. These procedures should only be billed at the time that these vials are supplied to the patient.

An example of billing for the provision of single or multidose vials of allergenic extract is as follows. Procedure Code 96165 represents the preparation of vials of non-venom antigens. The reimbursement for procedure code 95165 is based on preparing a 10cc vial containing one mixture of all the appropriate antigens and removing aliquots with a volume of 1cc. Using this calculation, a 10 cc vial would yield 10 doses.

Therefore, one (1) cc equals one (1) billing unit. This does not mean that the dosage must be in one (1)cc aliquots from a multidose vial. If a physician removes 1/2cc aliquots from a 10cc vial for a total of 20 doses from one vial, he/she may only bill Medicaid for 10 doses. Billing for more than 10 doses per vial would represent an overpayment and be subject to post payment review and adjustment.

When a multidose vial contains less than 10cc, physicians should bill Medicaid for the number of one (1) cc aliquots that may be removed from the vial. If a physician prepares two 10cc vials, he/she may bill Medicaid for 20 doses. A physician may remove 1/2cc aliquots from the vial, but may not bill more than a total of 20 doses.

The maximum number of billable units for procedure code 95165 became "20" (two [2]-10cc vials) effective November 1, 2006.

Deleted:
The number of...date of service.

Added: An example of...yield 10 doses.

Added:
Therefore, one (1)
cc...review and
adjustment.

Added: When a multidose...of 20 doses.

Added:
The maximum
number...effective
November 1, 2006

Deleted: When billing these...may be billed.

#### **Botulinum Toxin Injections**

HCPCS code for J0587 reads "per 100 units". Therefore, 100 units of J0587 will equal one billing unit. However, because of the expense of the drug. physicians are encouraged to schedule patients in a manner that they can use botulinum toxin most efficiently. For example, a physician schedules three patients requiring botulinum toxin type A on the same day within the designated shelf life of the drug (shelf life is four hours). The physician administers 30 units to all three patients and bills 30 units for the first two patients and 40 units for the last patient. The physician would bill 40 units for the last patient because the patient received 30 units but the physician had to discard 10 units.

HCPCS code for J0585 reads "per unit". Therefore this code requires the units of service on the claim to reflect the number of units used. However, if a physician must discard the remainder of a single does vial (sdv) after administering it to a patient, the Agency will cover the amount of the drug discarded along with the amount administered. For example, a physician administers 15 units of botulinum toxin type A and it is not practical to schedule another patient who requires botulinum toxin. Situations that are impractical to schedule another patient include (a) it is the first time the physician has seen the patient and did not know the patient's condition or (b) the physician has no other patients who require botulinum toxin injections.

Documentation requirements must include the exact dosage of the drug given and the exact amount of the discarded portion in the patient's medical record as well as the corresponding diagnosis. However, if no benefit is demonstrable by two sets of injections, further injections will not be considered medically necessary.

#### **Units of Service**

Physician drug maximum number of units allowed are calculated based on a "per dose" basis, and by the narrative description of the HCPCS code. Some dosages are inherent in the narrative description of the codes and will assist in determining the number of units to file. When administering a lesser or greater dosage than the narrative description providers should round the billing unit up to the closest amount charted. For example, J0290, Ampicillin, up to 500 mg:

If administering 1000mg, bill 2 units

750 mg, bill 2 units

500 mg, bill 1 unit

125 mg, bill 1 unit

The Agency supports the avoidance of wasted (discarded) medicine whenever possible.

#### Flu Vaccination

Procedure code 90657 is covered for the administration fee under the Vaccine for Children (VFC) program for eligible children under three years of age. Procedure codes 90656 and 90658 are a covered service for the administration fee under the VFC program from age three through age eighteen. Code 90658 is covered fee-for-service (vaccine medication) from age nineteen and above.

#### **Vaccines for Children (VFC)**

The Vaccines for Children (VFC) program offers free vaccines to qualified health care providers for children who are 18 years of age and under who are Medicaid eligible, uninsured, American Indian or Alaskan Native, or the under insured. Providers must be enrolled in the VFC Program to receive any reimbursement for the administration of immunizations provided to recipients 0-18 years of age. The Alabama Department of Public Health administers this program.

Medicaid tracks usage of the vaccine through billing of the administration fee using CPT codes. Refer to Section A.7, Vaccines for Children, in the EPSDT appendix in this manual, for covered CPT codes.

#### **ImmPRINT Immunization Provider Registry**

The Alabama Department of Public Health has established a statewide immunization registry. Please visit their website at https://siis.state.al.us for more information.

#### **Adult Immunizations**

Payment for immunizations against communicable diseases for adults will be made if the physician normally charges his patients for this service. Immunizations that are provided to Medicaid eligible recipients 19 years old and older must submit a claim for the appropriate CPT code. Vaccines are reimbursable on a fee-for-service basis. The administration fee may be billed separately if an office visit is not billed.

#### **Unclassified Drugs**

A provider who administers a physician drug not listed should use the following J codes:

- J3490 Unclassified Drugs
- J9999 Not otherwise classified, antineoplastic drugs.

The claim must be sent on paper with a description of the drug attached. Providers should submit a claim with the complete name of the drug, dosage and a National Drug Code (NDC) number. Please be sure to search the Physician Drug List to see if the drug is possibly under a generic name. The claims containing the unclassified procedure code must be sent to: EDS, Attn: Medical Policy, PO Box 244032, Montgomery, AL 36124-4032. EDS will determine the price of the drug.

#### **Pricing of Physician Drugs**

For Dates of Service prior to July 1, 2005, physician drug prices were updated semi-annually by EDS. Medicaid reimbursement was calculated by averaging the Average Wholesale Prices (AWP) from the Red Book or 80-95% of DIMA (Drug, Improvement, and Modernization Act).

Effective for Dates of Service July 1, 2005 and thereafter, the Alabama Medicaid Agency will adopt Medicare's Drug Pricing Methodology using the Average Sale Price (ASP) for HCPCS injectable drug codes.

#### **H.2 Physician Drug List by Name**

The following table provides a listing of valid physician drug codes sorted alphabetically by name. To view this list sorted numerically, refer to Section H.3, Physician Drug List by Procedure Code.

The inclusion or exclusion of a procedure code on this list does not imply Medicaid coverage, reimbursement, or lack thereof. To inquire regarding any restrictions/limits on these procedure codes, please consult the Provider Assistance Center at 1-800-688-7989. The pricing file must be verified to determine coverage and reimbursement amounts.

The following drugs can be injected subcutaneously, intramuscularly, or intravenously.

Effective for dates of service July 1, 2004 and thereafter, Medicaid will no longer accept X codes. Please utilize the following crosswalk when billing for services for which an X code was previously used.

X Code	Replacement HCPCS Code
X-1015	S0016
X1090	S0077
X-1365	J1700
X-1415	J1980
X-1460	J1055
X-1525	J2680
X-1545	J1980
X-1550	J3415
X-1573	J0696
X-1574	J0696
X-1655	J0595
X-1705	J3411
X-1717	J3301

### Appendix H as of 11/21/06

#### Replaced table

Procedure Code	Procedure Code Description	Prior Authorization

## H.3 Physician Drug List by Procedure Code

The following table provides a listing of valid physician drug codes sorted numerically by procedure code. To view this list sorted alphabetically, refer to Section H.2, Physician Drug List by Name.

The following drugs can be injected subcutaneously, intramuscularly, or intravenously.

#### Appendix H as of 11/21/06

Replaced table

Procedure		Prior
Code	Procedure Code Description	Authorization
	HEPATITIS B IMMUNE GLOBULIN (HBIG), HUMAN, FOR	
90371	INTRAMUSCULAR USE	NO
	RABIES IMMUNE GLOBULIN (RIG), HUMAN, FOR	
90375	INTRAMUSCULAR AND/ OR SUBCUTANEOUS USE	NO
	RESPIRATORY SYNCYTIAL VIRUS IMMUNE GLOBULIN	
90378	(RSV-IGIM), FOR INTRAMUSCULAR USE, 50 MG, EACH	YES
	IMMUNIZATION ADMINISTRATION (INCLUDES	
	PERCUTANEOUS, INTRADERMAL, SUBCUTANEOUS, OR	
	INTRAMUSCULAR INJECTIONS); ONE VACCINE (SINGLE	
90471	OR COMBINATION VACCINE/TOXOID)	NO
